

BP-6, BP-12 Biodiesel Purification Systems

The most **cost-effective** and **reliable** way
to **DRY WASH** your biodiesel!

No more water washing with the Green Fuels America BP-6 and BP-12 Biodiesel Purification Systems! The air operated, pumped, biodiesel purification system comes with all fittings to attach with ease to any biodiesel processor.

The BP-6 comes complete with a single, refillable purification tower and 5lbs. of Amberlite™ BD10-Dry™ Ion Exchange resin; enough to purify 1000 gallons of biodiesel at a cost of 4 cents per gallon. The BP-12 comes complete with two towers and 10lbs. of Amberlite™ BD10-Dry™.

Simply wheel the system to your processor, swap the lid with the supplied dry wash lid, turn on the system and walk away. Three hours later the fuel is crystal clear, purified and ready to use. It's that easy.

BP-6 System includes:

- Enclosed, wheeled cabinet
- Single Amberlite™ BD10Dry™ tower
- 5 lbs. Amberlite™ BD10Dry™
- Air pump
- Air controls and regulator
- Emergency Stop
- Dry wash lid and draw tube
- Hoses
